## **USER ANALYSIS OF AUMS**

HARSHITHA RANJITH

CB.EN.U4CYS21022

Why do we need user analysis?

- Learn the most popular features, why the product is used the way it is, and what the users want from it.
- Making the right decisions based on informed metrics tracking and a detailed customer roadmap will improve decision-making as it relates to new addable features.
- Establishing distinct personas will help you understand how different users interact and their perspectives.

### **About AUMS**

Amrita University Management System is a secure Academic management website designed for students to provide all the information they need and to make things easy for them to access the information.

It helps students keep track of things like attendance, assignment deadlines, resources for the course, marks, grades for each course semester-wise, etc.

Here are few advantages and disadvantages of AUMS which I noticed so far:

## Advantages:

1. Home page gives an overview of what AUMS looks like in a perfect way and helps us to access everything we need.

2. Toolbar placement in corner of the page makes it easier to access and handy for users to look for the options.

3. Placing the Quiz or Test link on the home page makes it easy for students to attend without any confusion at the last minute.

**December 2022** < Today >

Sun	Mon	Tue	Wed	Thu	Fri	Sat
27	28	29	30	1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

**Events for December 30, 2022**

 Deadline - [Due: Internal Examination \(Apt...](#) (B.Tech.,2021.R.CYS.1.CIR\_SSK211.)

4. Notifications “bell button” helps us to find our new updates easily even If we missed to notice.

	Announcements alerts from 12/17/2022 7:41 AM

	Announcements alerts from 11/15/2022 10:15 AM
	Announcements alerts from 11/13/2022 7:54 PM

## Disadvantages:

1. It's so hard to find the corresponding subjects by course code while using the website on mobile as we cannot find them easily by placing the cursor on it by doing in a laptop/desktop. So maybe just display the course code "20CYS202" instead of "B.Tech.2021.R.CYS.1.20CYS202".

2. The toolbar on the left side is difficult to understand what symbol is what. Feels like no connection between the symbol and what is actually opens when we click on it.

3. While logging in AUMS, it logs us out automatically and again we have to login which feels like is a waste of time.

Features that I felt like to be added:

- Make this page a little more student-friendly, especially the course code can be displayed in the form of the course name alone.
- Alignment of buttons can be little more convinient.

THANK YOU!
